Niyama

Rewarding Good Behaviour

A behavior-verified habit platform that turns discipline into real-world rewards.

The Problem

Modern users struggle with:

- Screen addiction
- Irregular sleep
- Inconsistent routines
- Low follow-through on habits

Existing habit apps rely on:

- Self-reporting
- Motivation and affirmations
- Streaks without consequences

Result: High churn, low consistency, weak accountability.

Why Existing Solutions Fall Short

- Motivation fades quickly
- No real accountability
- Easy to “cheat”
- No tangible reward for consistency

Apps help users *feel motivated* — not *stay disciplined*.

The Insight

Behavior change sticks when:

- Habits are measurable
- Proof replaces intent
- Rewards are tangible
- Motivation compounds over time

Intrinsic motivation works *after* habits form — not before.

The Solution: Niyama

Niyama is a behavior-verified habit app that:

- Tracks real actions via phone data
- Rewards consistency with real-world value
- Builds discipline before motivation

Core idea:

Do the habit → earn points → redeem real rewards → repeat.

Core Habits Tracked (MVP)

Hard-to-fake, system-verified behaviors:

- Wake before 8:00 AM
- Reduced screen time
- Steps (5k / 8k / 10k)
- Sleep by 10:30 PM
- Other user-opted behaviors

Designed to be:

- Binary
- Measurable
- Difficult to scam

Anti-Cheat & Verification

- Screen Time APIs
- Health & step data
- Time-based verification
- Daily & monthly caps

Rewards unlock only when **behavior actually happens**.

Motivation Model
(Points & Rewards System)

Extrinsic → Intrinsic Flywheel

- External rewards kickstart discipline
- Consistency builds habit
- Habit builds identity
- Rewards become secondary over time

Conversion: 1000 points = $1.00
Monthly reward is based on:
- Total accumulated points
- Subject to cap by subscription tier

Rewards are **earned**, not guaranteed.

Motivation Model
(Points & Rewards System)

HABIT POINT STRUCTURE

Habit	Points
Wake before 8 AM	+150 / -150
Sleep before 10:30 PM	+150 / -150
Screen time < 2h	+100 / -100
Steps ≥ 5000	+100 / -100

DAILY POINT RANGE

•Minimum possible: **0 points**
•Maximum possible: **1000 points**

Examples:
Perfect day:
500 + 150 + 150 + 100 + 100 = **1000 points ($1.00)**
Average day (2 good, 2 bad):
500 +150 -150 +100 -100 = **500 points ($0.50)**
Bad day:
500 -150 -150 -100 -100 = **0 points ($0.00)**

Point Deductions (Fair & Humane)

- Mostly missed rewards, not punishment
- Small, capped deductions for overuse
- Screen time and sleep only
- No negative balances
- No loss of already-earned rewards

Philosophy: Reward discipline, not perfection.

Membership Tiers

Tier	Price	Monthly Reward Cap
Free	$0	Up to $5
Plus	$4.99	Up to $10
Premium	$14.99	Up to $25

Free tier = trust & learning

Paid tiers = sustainability & scale

Premium ($14.99):

- Base cap: $20
- Bonus cap: $25 (if streak eligible)

IMPORTANT:

- $25 is NOT additional — it is the maximum total payout

Rewards Economics (Why This Works)

- Subscription funds rewards
- Not all users redeem
- Monthly caps limit liability
- Reward aggregators reduce cost
- Premium users subsidize free users

Rewards are a **growth engine**, not a cost center.

Worst-Case Risk Management

- Average redemption < 60% of cap
- Daily and monthly earning limits
- Redemption friction
- Behavioral breakage
- Adjustable point math

Built to survive even aggressive usage.

Competitive Landscape

App	Category	Est. Users	Time on Market	Funding Raised	Approx. Valuation
Lock&Stock	Reward for no phone use in class	~67,500 registered students reported	Founded 2017	Unknown / bootstrapped	Unknown
Pocket Points	Rewards for phone-off time	Available since 2014; adoption at 200+ campuses	Founded 2014	No public VC data	Unknown
Habitica	Gamified habit/task tracker	Tens of thousands+ (open source community)	Founded 2013	Kickstarter ~$41k; no known VC rounds	N/A / Small indie (est. <$10M)
Fabulous	Science-based habit & routines	500k+ downloads iOS (86k ratings); Android ~585k ratings	Mid-2010s (approx 2014–15)	VC-backed (raised funding — reports on CB Insights data)	Undisclosed – likely several $10M+ (VC backed)
LockedIn: HabitTracker & Focus	Habit + earn coins	Very small/early (App Store ratings low)	Appears recent (2023+) — indie	No public funding	Minimal/indie
Coach.me	Habit & coaching	Unknown public user numbers	Founded 2011	VC backing historically	Est. ~$10M–$30M+ (earlier growth)
Beeminder	Commitment tracker	Small/micro niche	~2011	Bootstrapped	Below $10M est.
StickK	Commitment contracts	Unknown (academic use)	~2007	Supported by larger institutions	N/A

Competitive Landscape: Digital Wellbeing & Habit Apps

App	Tracks Screen Time	Habit Tracking	Rewards / Points	Real-World Incentives	Focus
Lock&Stock	✅	❌	✅	❌	Reduce phone use
Pocket Points	✅	❌	✅	✅ (discounts)	Phone avoidance
Focus Friend	❌	❌	✅ (in-app)	❌	Focus sessions
Habitica	❌	✅	✅	❌	Gamified habits
Habit Tracker (Rewards)	❌	✅	✅	❌	Habit building
BePresent	✅ (awareness)	❌	❌	❌	Mindfulness
AppBlock / Freedom	✅	❌	❌	❌	App blocking
⚡ Niyama	✅	✅	✅	✅	Behavior change

Why Niyama Wins

- Real accountability
- Tangible rewards
- Harder to cheat
- Strong retention loops
- Platform potential with brands

This is not just a habit app — it’s a **behavior layer**.

Business Model

- Subscription revenue
- Reward partnerships
- Aggregator discounts
- Long-term brand sponsorships

Clear path to:

- Positive unit economics
- Scale without burn
- Optional enterprise partnerships later

Go-To-Market (Early)

- Friends & family beta (15–20 users)
- Internal Dogfooding
- Feedback-driven iteration
- Focus on retention > growth
- Prove habit compliance first

Estimated Cost to Reach Pre-Seed Ready Prototype

Category	What It Covers	Estimated Cost
Company incorporation	Delaware C-Corp via Clerky/Stripe Atlas, registered agent, legal templates	$800 – $1,200
Domain + email setup	Domain name + Google Workspace	$20 – $80
Development infrastructure (3–6 months)	Vercel hosting, Supabase backend, analytics, error tracking	$60 – $300
Development tools	GitHub, Figma, project management, AI coding tools	$0 – $150
Reward payouts (dogfooding – 20 users)	Avg $5/user/month for 3 months	$300
Reward payouts (beta – 100–200 users)	Avg $5/user/month for 2–3 months	$1,000 – $3,000
Apple App Store developer account	Required for iOS publishing	$99/year
Google Play developer account	Required for Android publishing	$25 one-time
Testing services / devices	TestFlight, Play Console, minor device testing	$0 – $200
Misc startup expenses	small legal, accounting, incidentals	$200 – $500
Total Estimated Cost	**Reach Pre-Seed Ready Prototype (6-month runway)**	**$4000 – $5000**

Team & Equity Structure

- CEO: Vision, execution, partnerships
- CTO: Tech architecture & App
- Design Lead: UX, habit psychology
- Ops/Admin support
- Advisors

(Behavior science, health, partnerships)

Role	Equity
CEO	50%
CTO	25%
Design Lead	7.5%
Ops/Admin	2.5%
Advisors	2.5%
Seed A Dilution/Option Pool	12.5%

Clear ownership. Clear accountability.

Vision

Niyama aims to become:

- The default habit accountability layer
- A trusted reward ecosystem
- A behavior data platform for wellness brands

Rewarding good behavior — at scale.
